ATLAS NEWS WIRE

02-04-08

Atlas Manufacturing announces the launch of it's newest precision fabrication machine, the TRUMPF TruPunch 5000. The acquisition of this machine will allow for longer, faster and more precise production runs. [More Info...](#)

New Advanced Technology Hardware Insertion

Atlas utilizes PC controlled programmable Haeger hardware insertion machines. The auto feed feature from bowls speeds up the process. The insertion graphics display along with laser locating light ensures parts receive the correct hardware. This greatly increases throughput with parts utilizing multiple pieces of hardware such as computer chassis, computer racks, server racks, monitor mounts, card readers, disk printers and much more.
