REACH Declaration Form

REACH Substances of Very High Concern

Dear Atlas Supplier,

The European Union (EU) has adopted regulation no.1907/2006, also known as the REACH (Registration, Evaluation and Authorization of Chemicals) regulation, which became effective 1st June 2007.

REACH requires actors in the supply chain to identify the presence of Substances of Very High Concern (SVHCs) identified on the Candidate List maintained by ECHA. It is planned that this Candidate List will be updated on a regular basis and at least annually. In accordance with Article 33 of REACH, suppliers of articles must communicate the presence of any Candidate List substances present in the articles at a concentration of >0.1% by weight. ECHA defines an article as an object which during production is given a special shape, surface or design which determines its function to a greater degree than does its chemical composition.

The first Candidate List of 15 substances was published on October 28, 2008. . **There have been additional substances added with the latest update January 16, 2020 the list is now up to 205 substances.**

The updated SVHC Candidate List of 205 substances can be found at the URL below:

<http://echa.europa.eu/web/guest/candidate-list-table>

We certify that all of the products we supply to Atlas **DO NOT CONTAIN** any of the substances on the list of SVHC (REACH SVHC List per link) in a concentration greater than 0.1% by weight.

We certify that all of the products we supply to Atlas. EXCEPT those in the attached list, **DO NOT CONTAIN** any of the substances indicated on the list of SVHC (REACH SVHC List per link) in a concentration greater than 0.1% by weight. Please provide a list of products that do not meet the REACH requirements.
